DETAILED ACTION

Claim Objections

1. Claim 19 is objected to because of the following informalities: it appears that claim 19 should depend from claim 13 and not claim 1 because if it did depend from claim 1 it would be redundant (see claim 12). Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-3 and 6-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Ferraiolo #6,296,422. Ferraiolo discloses a retaining wall system comprising at least one wall section comprising a base 301 and a retaining face 101 and a hinge (defined by bend lines) connecting the base to the retaining face. The retaining face includes an open grid pattern and reinforcing ribs. Such open grid pattern provides holes at top, bottom, and sides which would allow connection to adjacent wall sections.

Allowable Subject Matter

4. Claims 13-20 are allowed.

Art Unit: 3673

5. Claims 4, 5, and 9-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The following is a statement of reasons for the indication of allowable subject matter: as to claim 13, the prior art of record fails to show or suggest a retaining wall system comprising "a plurality of receiving elements between said sides of both said base and retaining face to allow different angle settings between said base and retaining face, and at least one brace for each set of said receiving elements" as specifically called for in the claimed combination.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
